

We inspire our customers worldwide with our innovative products and services and create added value for people and environment. As a traditional medium-sized group of companies with over 300 colleagues at 6 locations in Germany and abroad, we are pushing our international growth and our transformation into a modern, value-oriented and people-oriented company with a flat hierarchy and culture of trust and short decision-making processes.

To strengthen our sales activities, we are looking for an

APPLICATION AND SALES ENGINEER (M/F/D)

Location: Burton-upon-Trent

YOUR TASKS

- Developing technical dosing system solutions in the field of dosing technology based on customer enquiries
- Design and calculation during quotation phase as well as providing in-depth advice right through to the final customer solution
- Providing technical advice to customers on dosing applications, system solutions and their integration into existing processes, both on-site at the customer's premises and at trade fairs or conferences
- Build, maintain, and strengthen customer relationships
- Management of customer projects
- Business travel within UK for sales meetings and technical discussions

YOUR PROFILE

We are looking for a candidate who has successfully completed training as a Technician or holds a degree in Mechanical Engineering, Electrical Engineering, Mechatronics, Process Engineering or a related engineering discipline. The ideal candidate is proficient in standard Microsoft Office applications and has experiences working with ERP and CRM systems. Knowledge of common AutoCAD software is considered an advantage. Experiences with customer processes in the water treatment industry as well as in the beverage and food sectors is highly desirable. We are seeking a customer-focused professional with strong communication skills, a flexible and solution-oriented working style, and the ability to collaborate effectively with both internal and external stakeholders.

In addition, candidates should ideally have 3-5 years of professional experiences in the management and execution of projects, demonstrating the ability to coordinate activities across different regions and cultures while ensuring successful project delivery.
